EXPERIENCE

The Caraballo Group, Remote — *Front-End Developer*

May 2023 - July 2023

- Delivered performant and responsive react code that faithfully recreated customer mockups and satisfied all required functionality.
- Collaborated closely with government stakeholders, demonstrating progress and providing deliverables on a bi-weekly basis.
- Rapidly came up to speed on an existing codebase in order to maintain high-quality code while successfully meeting the contract deadline.

Evans & Chambers Technology, D.C. — *Full-Stack Developer*

February 2018 - January 2023

- Led the development of several new features within a full-stack application, enabling us to secure several large customers.
- Collaborated directly with customers to understand their needs while managing critical hotfixes to ensure a smooth user experience.
- Contributed to all aspects of the application, ranging from performance optimizations to designing intuitive user interfaces.
- Onboarded and mentored several interns and junior team members, leading peer code-reviews and organizing monthly check-ins.
- Assisted with production deployments, writing and initiating large scale database migrations while monitoring the application health.

EDUCATION

University of Maryland, College Park — *B.S. Computer Science*

September 2014 - May 2018

- Major in Computer Science with a mathematics concentration.

CERTIFICATIONS

AWS Certified Solutions Architect
